

Meritor Part

Meritor Part - Meritor is a leading global supplier which is proudly founded on a one hundred year custom of quality and service. They focus on various modules, integrated systems and parts to original machinery manufacturers and the aftermarket for the industrial and transportation sectors.

Meritor prides itself in the company's unique energy and believes that this energy contributes to their competitive advantage in the global operations. The company values their customers and wishes to guarantee their success while anticipating their various requirements. Meritor begins with a philosophy that values diversity of individuals and their broad thought processes. Operating in 19 nations and employing over 11,200 individuals, Meritor promotes collaboration and innovation among a team of experienced experts.

By just hiring future focused individuals, Meritor strongly feels these top-caliber individuals would be able to quickly get used to to changing surroundings and exhibit the commitment and performance required so as to attain results in the competitive materials handling trade. The company empowers their teams to make sound business decisions in order to improve the overall success of the business. In return, Meritor provides their employees various opportunities for personal and professional growth.

Their Advanced Engineering team is at the forefront of components and system engineering which comprise axles, drivelines, suspension and braking systems utilized for medium and heavy duty trucks, military vehicles, trailers, off-highway vehicles and buses. The Meritor Advanced Engineering team is developing. They opened a new technical center in Bangalore, India in September 2009 to be able to lead their advanced product development initiatives which represent the whole Asia Pacific region. This team is likewise responsible for supporting the needs of their worldwide engineering workers.

The Quality team at Meritor is a customer-focused and dynamic group who is dedicated to ensuring optimum development at their aftermarket distribution facilities and production plant which are located on 5 continents and in 19 nations.

They have their supplier network that is specially located to be able to support the growth of the business. Every regional team has globally supported quality systems, initiatives and centralized in Materials Engineering and Six Sigma. Meritor's growing Six Sigma program encourages a data-driven, fact-based approach to decision making within every part of the trade. The DFSS or Design for Six Sigma ensures product reliability in each and every region. The team is also comprised of transactional Green Belts who utilize Six Sigma tools to business processes and apply lean methods.
